

A new addition to the INCOSE UK Don't Panic book series

INCOSE UK are pleased to announced the release of a new book in the Don't Panic Book Series- **Don't Panic! – The Absolute Beginner's Guide to Architecture Framework.**

The book focuses on explaining what an architecture framework is, identifies what their benefits are, and describes some of the most common frameworks found in enterprise architecture, defence acquisition, systems-of-systems and Model-Based Systems Engineering.

Author James Towers said *“Suppose we are going to communicate the architecture of a system to other people. In that case, it is useful to have a consistent and coherent way to do so- an Architecture Framework”.*

While Author Aurelijus Morkevicius said *“Following on from James's comment, our book guides you on choosing and tailoring an Architecture Framework and identifies its benefits as well as providing links to further resources.”*

The INCOSE UK President Ian Gibson commented *“It is fantastic to see our Don't Panic book series continue to grow and we welcome this new addition by James Towers and Aurelijus Morkevicius”*

You can buy a copy of Don't Panic! – The Absolute Beginner's Guide to Architecture Framework by visiting the [INCOSE UK online store](#).

A new addition to the INCOSE UK Don't Panic book series

INCOSE UK

INCOSE UK is a Professional Engineering Institution licensed by the Engineering Council. INCOSE UK acts as the UK Chapter of the International Council on Systems Engineering (INCOSE), a not-for-profit membership organisation founded to develop and disseminate the interdisciplinary principles and practices that enable the realisation of successful systems. INCOSE UK is administered by INCOSE UK Ltd.

INCOSE UK holds an annual conference and a set of training events each year; has active regional, working and special interest groups; and publishes a variety of books, guides and other products tailored for UK members. Despite its focus on UK-specific needs, INCOSE UK attracts members from all around the globe. The 'flavour' of Systems Engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of Systems Thinking and Systems Engineering principles in domains outside of the traditional domains of defence and aerospace. In recent years, the membership of INCOSE UK has widened significantly from its roots, expanding to include domains such as: automotive, rail, energy, civil engineering, space, medicine, and security.
