

ASEC 2021 Venue and Date Update

INCOSE UK would like to announce that the venue and dates of The Annual Systems Engineering Conference (ASEC) 2021 have changed.

Due to circumstances outside of INCOSE UK's control, the event will no longer be held at Heythrop Park Resort on 16th and 17th November 2021 as planned. The event will instead be taking place at **Royal Armouries Museum in Leeds**. To accommodate this change, it has also been necessary to move the dates to **23rd and 24th November 2021**.

The Annual Systems Engineering Conference is the UK's premier Systems Engineering event, attracting a wide range of industry professionals, international presenters and practitioners, which provides a distinguished platform for networking, learning and sharing ideas.

This year's theme is **"Creating Stability in Uncertain Times"** within which the following subthemes will be explored: Embracing Change and Transformation, Building Resilient Organisations, Developing Technical Skills for the Future and Reflection on Best Practice in Unusual Circumstances. INCOSE UK has received a record number of abstracts and the programme will shortly be published on the [event website](#).

Malcolm Thomas, INCOSE UK President-Elect, says:

"ASEC is the premier event in the INCOSE UK calendar and I am delighted that we will be returning to the Royal Armouries in Leeds where we held our 25th anniversary ASEC in 2019.

We have an excellent range of papers and tutorials lined up and it promises to be an outstanding event."

The programme this year will include Tutorials, Professional Development workshops, keynote speeches, a network dinner and much more. INCOSE UK is looking forward to welcoming back systems engineers to this year's conference and being an enabler for the face-to-face sharing of knowledge, good practice and creation of networking opportunities.

INCOSE UK

INCOSE UK is a Professional Engineering Institution licensed by the Engineering Council. INCOSE UK acts as the UK Chapter of the International Council on Systems Engineering (INCOSE), a not-for-profit membership organisation founded to develop and disseminate the interdisciplinary principles and practices that enable the realisation of successful systems. INCOSE UK is administered by INCOSE UK Ltd.

INCOSE UK holds an annual conference and a set of training events each year; has active regional, working and special interest groups; and publishes a variety of books, guides and other products tailored for UK members. Despite its focus on UK-specific needs, INCOSE UK attracts members from all around the globe. The 'flavour' of Systems Engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of Systems Thinking and Systems Engineering principles in domains outside of the traditional domains of defence and aerospace. In recent years, the membership of INCOSE UK has widened significantly from its roots, expanding to include domains such as: automotive, rail, energy, civil engineering, space, medicine, and security.
