

### INCOSE UK Endorsed Training Provider Scheme

INCOSE UK are delighted to announce the launch of their Endorsed Training Provider Scheme.

This scheme will allow organisations who provide professional Systems Engineering-related training courses to apply and be assessed in order to obtain the status of 'INCOSE UK Endorsed Training Provider'. Successful applicants will be able to use this term, and an associated logo, on publicity and marketing material.

INCOSE UK President, Ian Gibson said: "I am delighted to see this scheme being rolled out. This is something that we have wanted to do for a long time, as it will provide individuals and organisations with a route to obtaining high quality training from reputable organisations which have been assessed as suitable providers of Systems Engineering training."

As part of the assessment, training providers will be required to submit evidence based on a series of categories:

- Organisational Activity
- Organisational Capability
- Course Content – Providing an overview of standard courses
- Course Content – Providing an overview of the how the training provider creates and tailors courses for individual clients
- Training Competence
- Training Reviews

It must be noted that it is the training provider that is endorsed, **not** the detailed content of the actual courses.

All assessments will be carried out by suitably qualified and experienced Systems Engineering professionals, with a re-assessment required every three years, or whenever the scope of the provider's initial assessment changes.

The first two companies to have been awarded this status are Burge Hughes Walsh and Scarecrow Consultants Ltd.

#### **INCOSE UK**

INCOSE UK is a Professional Engineering Institution licensed by the Engineering Council.

INCOSE UK acts as the UK Chapter of the International Council on Systems Engineering (INCOSE), a not-for-profit membership organisation founded to develop and disseminate the interdisciplinary principles and practices that enable the realisation of successful systems. INCOSE UK is administered by INCOSE UK Ltd.

INCOSE UK holds an annual conference and a set of training events each year; has active regional, working and special interest groups; and publishes a variety of books, guides and other products tailored for UK members. Despite its focus on UK-specific needs, INCOSE UK attracts members from all around the globe. The 'flavour' of Systems Engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of Systems Thinking and Systems Engineering principles in domains outside of the traditional domains of defence and aerospace. In recent years, the membership of INCOSE UK has widened significantly from its roots, expanding to include domains such as: automotive, rail, energy, civil engineering, space, medicine, and security.
