

INCOSE UK's Licensed Member status

INCOSE UK Ltd has just received approval to become a Licensed Member of the Engineering Council (having previously held Professional Affiliate status).

INCOSE UK is therefore licensed by the Engineering Council to assess candidates for inclusion on the national register of professional engineers and technicians as Chartered Engineer (CEng), Incorporated Engineer (IEng) or Engineering Technician (EngTech).

INCOSE UK President, Kirsty Akroyd-Wallis, stated "Our volunteers, INCOSE UK Council and Secretariat have worked hard to ensure the processes and systems are in place so we can offer our members the opportunity to become professionally registered via their home institute. We have been strongly supported by the Engineering Council in this endeavour over the past 6 months and we are delighted to have been successful. It is an honour to be awarded Licensed Member status of the Engineering Council and is a sign of how INCOSE UK has developed since its creation in 1994".

Applications are being accepted with immediate effect.

Information for Editors

Engineering Council

The Engineering Council is the UK regulatory body for the engineering profession. We hold the national registers of 222,000 Engineering Technicians (EngTech), Incorporated Engineers (IEng), Chartered Engineers (CEng) and Information and Communications Technology Technicians (ICTTech).

In addition, the Engineering Council sets and maintains the internationally recognised standards of professional competence and ethics that govern the award and retention of these titles. This ensures that employers, government and wider society - both in the UK and overseas - can have confidence in the knowledge, experience and commitment of professionally registered engineers and technicians

INCOSE UK Ltd

INCOSE UK Ltd. operates the UK Chapter of the International Council on Systems Engineering (INCOSE). With over 1,000 individual and 37 corporate members, it exists primarily to serve UK-specific needs and is a key chapter within INCOSE. It has strong links with other UK institutions and it plays a prominent role in both the domestic and the international scenes. It holds an annual conference, has active regional, working and special interest groups and publishes a variety of guides and other products tailored for UK members.

Despite its focus on UK-specific needs, the UK Chapter attracts members from territories around the globe.

The 'flavour' of Systems Engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of systems thinking and Systems Engineering principles in domains outside of the traditional domains of defence and aerospace. In recent years, the membership of INCOSE UK has widened significantly from its roots, expanding to include domains such as transportation - particularly rail - energy, civil engineering, space, medicine, and security.
